

ACCA technology for finance workshops

We are pleased to invite you to 'Technology for finance' series of workshops.

The series embraces valuable topics on opportunities and challenges data present for the accountancy and finance profession. The imperatives for working with data include:

- Developing new metrics
- Learning new analytical skills
- Creating a visual language of data 'art'
- Cyber crime.

In cooperation with Microsoft, KPMG, FinStat and BlackSwan Rational we would like to share practical experience on case studies and theoretical knowledge. Further we encourage developing a network of new personal contacts and sharing the best practice on the Slovak market.

PROGRAM OF TECHNOLOGY FOR FINANCE WORKSHOPS

1 Open data – Open data trends/usage

14 October 2014

How can finance managers benefit from open data, matching and mapping open data and company data and benefits – credit risk, competitors, business development.
